To administrators Zoom

One-click password link tutorial

In order to protect yourself from unwanted entry, it is strongly recommended that you activate a password to enter your meeting. To facilitate access, activate the one-click single-click link that contains your meeting number and password. It's easy!

In your web account settings, search for "password" to find these two options that need to be enabled.

2020-09-14

1. Activate the obligation of a password for scheduled meetings:

Require a password when scheduling new meetings

A password will be generated when scheduling a meeting and participants require the password to join the meeting. The Personal Meeting ID (PMI) meetings are not included.

2. Generate a link including the password. This link will be added to the invitation text.

Embed password in meeting link for one-click join

Meeting password will be encrypted and included in the join meeting link to allow participants to join with just one click without having to enter the password.

This makes it easier for members to click a "one click" link. Thus we are protected from malicious visitors
